

Japanese Dance Project

My aim was to create a short (5 day) lesson plan on Japanese dance suitable for middle school and high school students. I created a Powerpoint to provide visual stimulation to students while acting as a focus around which to build the lesson. It provides information and images on several types of dance. I also created a handout for students to keep and take notes on. I included two videos to use as teaching aids: one short educational film, and a feature-length movie about Western styles of dance in Japan. I have created several short assignments for the students to complete in order to show their understanding of the subject matter.
