

## About the Banner Page Name Convention

The seven-letter naming convention used throughout the Banner Administrative Applications helps you to recognize and remember page names more readily. The first three positions represent: 1) the Banner system, 2) the module within the Banner system, and 3) the object (page) type. The last four positions are an abbreviation of the page name.

For example, **SPAIDEN**

- Is a page in the **Banner Student** system (**S = Position 1/System = Banner Student**).
- Is in the **General Person** module (**P = Position 2/Module = General Person** module in **Banner Student**).
- Is an **Application** page (**A = Position 3/Object Type = Application** page type in the **General Person** module of **Banner Student**).
- **IDEN**, in Positions 4-7, is an abbreviation for the page name which is **General Person Identification**.

The pages that follow describe the letter codes associated with Positions 1-3.
