

## Saving Data From Process Run via Job Submission

If you are a person who uses Job Submission, you may save a .lis or .log file to your workstation when you submit the job with DATABASE as the print option.

The screenshot shows the 'Process Submission Control' window for 'GJPCCT, 9.3.18 (ADMIN)'. The 'PARAMETER VALUES' section is active, displaying a table with the following data:

Number	Parameters	Values
01	Jobs to be Selected	
02	Print User Level Defaults	Y

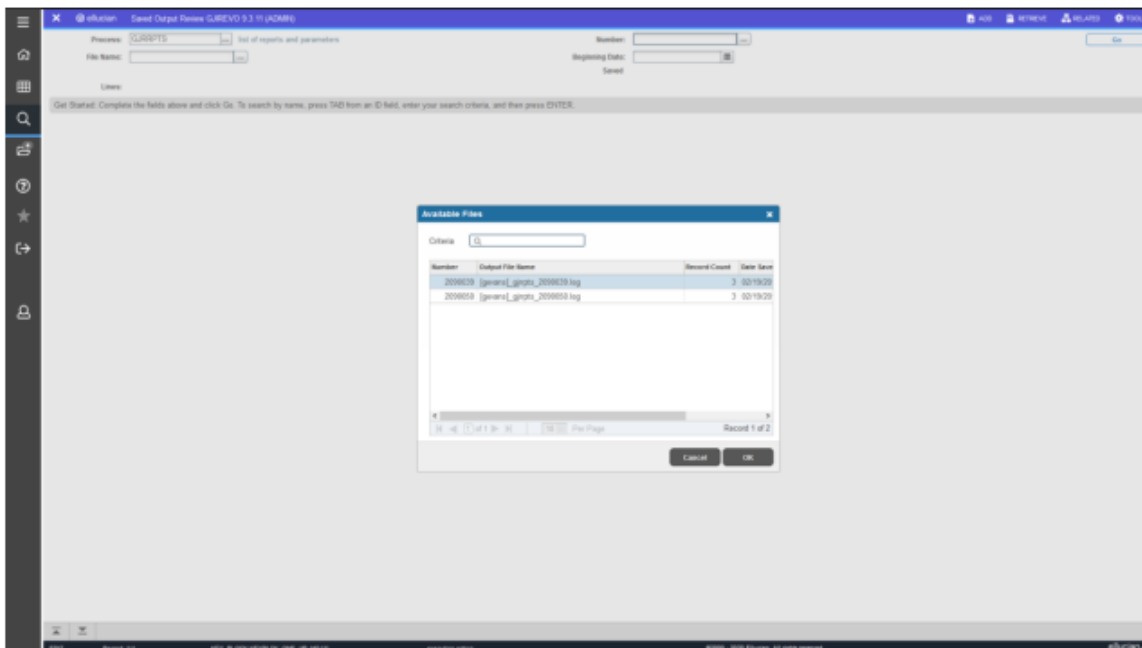

Below the table, there is a 'SUBMISSION' section with a checkbox for 'Save Parameter Set as' and a 'Submit' button.

After the job has completed execution, select Review Output [GJIREVO] from the related menu.

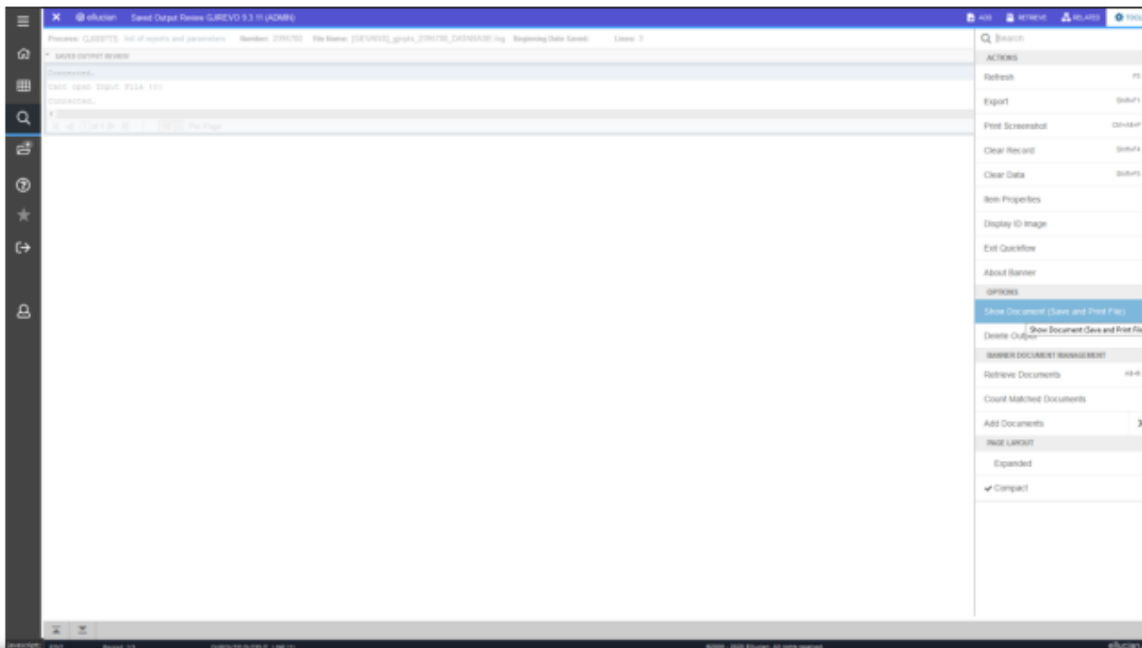

The screenshot shows the same 'Process Submission Control' window. A context menu is open on the right side, listing several options:

- Review Output [GJIREVO]
- Delete Multiple Saved Output [GJREVO]
- Upload File [GJAUPLF]
- Upload File [GJAUPLF]
- Review PDF/print test output [GJALIS]

Select the file you wish to save from the list of file by clicking on the ellipse next to Number.

Click the Tools menu in the top right, click the 'Show Document' option.

Click Yes.

A new browser window will open with the data. To save the data to your Workstation click File on the browser menu and then select Save As. Specify the filename and the location on your workstation where you want the file saved. You will also need to specify that you want the file saved as TEXT.
