

2021-2022 FOREST RESOURCE MANAGEMENT MINOR

(Minimum of seven course credits)

The curriculum for the Forest Resource Management minor is an interdisciplinary minor which combines a foundation of classes in ANR and BIO with distribution courses that can be selected to provide focus in wildlife, natural resources, wood utilization, or management. The minor will consist of 7 course credits. No more than four courses can count both toward a student's major and the FOR minor, and no more than three courses can count both toward a different minor and the FOR minor.

Core Knowledge Courses

ANR 360 Forest & Wildlife Management

BIO 344 Dendrology & Forest Ecology

Required Core Courses (5 total)

BIO 110 Modern Biology

ANR 130 Plant Science **OR**

BIO 114 Botany

ANR 240 Soil Science

Required Distribution courses (2 total)

Select two courses in consultation with your minor advisor from the list below. As guidance we suggest the following sets from which to select the two courses (based on the area most in line with the student's interest).

Natural Resources

ANR 342 Soil & Water Conservation

CHM 134 Accelerated Environmental Chemistry

SENS/BIO 310 Ecology

SENS 320 Intro to Geographic Info System

Wildlife

BIO 327 Herpetology

BIO 332 Mammalogy

BIO 342 Field Botany

Wood Utilization

ECO 102 Principles of Microeconomics

TAD 140 Design Production in Woods

TAD 340 Studio in Woods

Management

ECO 102 Principles of Microeconomics

BUS 315 Management **OR**

ANR 375 Farm Resource Management **OR**

ECO/SENS 370 Environmental Issue Public Policy
